Index of Abstracts

Volume 4 (1983)

Abdelkader, Mostafa A. *Exact solutions for second-order nonlinear, nonautonomous Euler equations*, 210. *A nonlinear modified Bessel equation having oscillatory solutions*, 297. *How to keep constant the amplitude of a damped simple pendulum*, 330. *Exact solutions for a second-order nonlinear differential equation*, 395. *A class of similarity solutions for a nonlinear one-dimensional porous-media equation*, 506. *Nonlinearity in the second derivative of a second-order differential equation*, 584.

Abedi, F. See **Evans, B.**

Abeles, Francine. *Power in decisions between multiple alternatives* (Preliminary report), 268.

Abian, Alexander. *Solvability of infinite systems of polynomial equations*, 200. *A purely number-theoretic attempt to prove Picard's theorems*, 295. *Solvability of infinite systems of polynomial equations over the field of complex numbers*, 316. *A fixed point theorem equivalent to the axiom of choice*, 388.

Abikoff, William. *Conformal and quasiconformal mappings* (Preliminary report), 425.

Abotteen, Essam and **Lee, Man-Wai.** *Character formula of outer plethysms*, 148.

Abramovich, Yuri A. *A theorem on isometry between normed lattices*, 133. *On positive projections in L_p-spaces*, 205.

Abrams, Gene D. *The isomorphism problem for local incidence algebras* (Preliminary report), 39.

Abu-Khusam, Hasar and **Yaqub, Adil.** *Commutativity and structure of rings with commuting nilpotents*, 38.

Abu-Muhanna, Yusuf. *Support points of the unit ball of H^p $(1 \leq p \leq \infty)$*, 347.

Acker, Andrew F. *On the approximation of free boundaries satisfying a Bernoulli condition* (Preliminary report), 130.

Ackerman, Neill H. *A criterion for a curve in Euclidean n-space to be closed*, 97.

Adámek, J., Koubek, V., Nelson, E. and **Reiterman, J.** *Arbitrarily large continuous algebras on one generator*, 487.

Adams, Colin. *Hyperbolic volumes of link complements*, 575.

Adams, M. E., Koubek, V. and **Sichler, J.** *Endomorphism semigroups in varieties of pseudocomplemented distributive lattices*, 163.

Aftabizadeh, A. R. *Solutions of fourth order boundary value problems* (Preliminary report), 63.

Aharoni, Ron. *Matchings in infinite graphs*, 487. *König's theorem for infinite graphs*, 537.

Ahlbrandt, Calvin D. *The algebraic Riccati equation of filtering and control* (Preliminary report), 176.

Ahmad, S. and **Laser, A. C.** *Critical point theory and second-order periodic systems*, 63.

Ahuja, Mangho. *A note on curves and their profile* (Preliminary report), 95.

Aisenman, Michael. *Stochastic geometry in quantum field theory and classical statistical mechanics*, 109.

Akbulut, Selman. *The topology of real algebraic sets* (Preliminary report), 373. *Topology and real algebraic geometry*, 558.

Akemann, Charles A. and **Shultz, Frederic W.** *Perfect C^*-algebras* (Preliminary report), 77.

Akis, Vladimir N. *Inverse systems of absolute retracts and the fixed point property*, 589.

Alas, O. T. *Uniform paracompactness and uniform paralindelöfness* (Preliminary report), 400.

Albano, A. M. and **Martelli, Mario.** *Spurious numerical solutions of initial and boundary value problems* (Preliminary report), 354.

Albert, Martin and **Spencer, Domina Eberle.** *Classsification of covariant derivatives of higher order tensors*, 420.

Albertson, Michael O. *Homomorphisms of 3-chromatic graphs* (Preliminary report), 407.

Albrecht, Felix. *On certain properties of the Bellman function* (Preliminary report), 176.

Al-Daffa, Ali A. and **Stroyls, John J.** *Quadrature and cubature in medieval Near Eastern mathematics* (Final report), 270.

Al-Dukair, Fawsi A. *Examples of non-isomorphic arithmetically equivalent fields*, 341.

Alexander, H. *Subharmonicity and function algebras* (Preliminary report), 351.

Alexander, Ralph. *Integral mean curvature of polyhedral surfaces*, 325.

Alfeld, Peter. *Multivariate derivative estimation by functional minimization*, 285.

Alinhac, S. and **Metivier, G.** *Propagation of analyticity for non linear equations*, 560.

Alinhac, Serge. *Uniqueness and non-uniqueness in the Cauchy problem*, 559.

Alladi, Krishnaswami. *A new application of the sieve to probabilistic number theory*, 21. *Moments of additive functions and the sequence of shifted primes*, 143.

Allan, R. B., Hedetniemi, S. T. and **Laskar, Renu.** *A note on the total domination number of a graph*, 15.

Allenby, R. B. J. T. and **Tang, F. C. Y.** *On conjugacy separability of 1-relator groups with torsion*, 244.

Almeida, Jorge. *Some syntactic properties of the recognizable submonoids of a free monoid* (Preliminary report), 185.

Almgren, F. *Applications of multiple valued functions*, 367.

Alonso, M. E. *Semi-integral extensions and proper morphisms*, 556.

Alperin, Roger C. and **Moss, Kenneth N.** *Real-valued Archimedean length functions in groups*, 158.

Al-Rashed, Abdallah M. and **Darst, Richard B.** *Best L_∞-approximation of measurable, vector-valued functions*, 360.

Alspach, Brian and **Ruis, Sergio.** *Isomorphic factorizations of complete graphs into regular graphs*, 16.

Alt, Wolfgang. *Stability results for diffusion-aggregation systems*, 276.

Altman, M. *Different proof methods in the theory of contractor directions*, 172. *Contractor directions with nonlinear majorant functions and iterative methods of contractor directions*, 365.

Alvis, Dean. *Murnaghan's rule revisited* (Preliminary report), 47.

Amberg, Bernhard. *On the theorem of Kegel and Wielandt*, 44.

Amick, Charles J. *Degree theoretic versus variational methods for certain partial differential equations* (Preliminary report), 357.

Amir, Dan. *Radius, self radius and diameter*, 170.

Amrine, Brian. *Some problems about cohomology of decomposable unitary operators with respect to an irrational rotation* (Preliminary report), 278.

Anacker, Steven E. *Covers of trees* (Preliminary report), 226.

Ancel, Fredric D. *Oribts of embeddings of S^2 in S^3* (Preliminary report), 283. *Resolution and cellular approximation imply codimension-one tame approximation*, 504.

Anco, S. C., Chivukula, R. S. and **Lagerstrom, P. A.** *Linearization and autonomization of ODE*, 437.

Anderson, Douglas R. *Geometric applications of lower algebraic K-theory* (Preliminary report), 373. *Balanced splittings for finite group actions of Smith type* (Preliminary report), 543.

Anderson, Ian M. See **Arms, Judith M.**

Anderson, Marlow and **Feil, Todd.** *Finite varieties of lattice-ordered groups* (Preliminary report), 19.

Andradas, Carlos. *Real places in function fields*, 555.

Andréka, Hajnal, Comer, Stephen D. and **Németi, István.** *Surjectiveness of cylindric algebras*, 293.

Andreoli, Dorothy Wallace. *The Selberg trace formula for* $\mathrm{SL}(3,\mathbf{Z})\setminus \mathrm{SL}(3,\mathbf{R})/\mathrm{SO}(3,\mathbf{R})$, 428.

Andrew, A. D. *Projections on tree-like Banach spaces*, 171.

Andrews, G. E. and **Bressoud, D. M.** *Some applications of the Burge connection between partitions and binary words* (Preliminary report), 228.

Andrews, Peter B. *Automating higher order logic*, 6.

Anellis, Irving H. *The set of recursive ordinals is decidable*, 5. *The Limaye conjecture on Banach spaces and the axiom of choice*, 298. *Russell on Cantor: 1896 – 1897*, 385. *Bertrand Russell's earliest reactions to Cantorian set theory* (Preliminary report), 531.

Angell, Thomas S. *Multi-valued Urysohn integral equations* (Preliminary report), 76.

Angelos, James A., Henry, Myron S., Kaufman, Edwin H. Jr. and **Lenker, Terry D.** *Local Lipschitz constants* (Preliminary report), 419.

Anick, David J. *On the homology of associative algebras*, 519.

Anshel, Michael. *Complexity of problems for infinite groups*, 269.

Antosik, Piotr. *A matrix method in analysis* (Preliminary report), 84.

Apostol, Constantin and **Bercovici, Hari.** *Operators dilated by the Bergman shift* (Preliminary report), 473.

Appling, William D. L. *Collective operators: additive and integration-by-parts*, 201. *Finite additivity and uniform absolute continuity*, 295.

Arahovitis, John. *On a generalized shift dynamical system* (Preliminary report), 586.

Arason, J., Elman, R. and **Jacob, B.** *Semi-rigidity and Galois cohomology* (Preliminary report), 552.

Archdeacon, D. S. and **Dinitz, J. H.** *Row complete Latin squares of order* 25 *and* 33, 193.

Arkin, Joseph. *An extension of the Fibonacci numbers—revisited*, 233. *Researches on partitions revisited*, 341.

Armendaris, Efraim P. *Semi-Artinian rings and left π-regularity*, 149.

Arms, Judith M. and **Anderson, Ian M.** *Conservation laws and formal power series solutions for field equations* (Preliminary report), 435.

Arner, Paul R., Barnhill, R. E. and **Stead, S.** *Examples of multistage approximations*, 285.

Arnold, Dave and **Vinsonhaler, Charles.** *Pure subgroups of finite rank completely decomposable groups. III*, 244.

Arnon, Dennis S. and **McCallum, Scott.** *A polynomial-time algorithm for the topological type of a real algebraic curve*, 552.

Aronson, D., Doedel, E. and **Othmer, H. G.** *Some bifurcation phenomena in coupled oscillators* (Preliminary report), 278.

Aronson, D., Johnson, J. and **McGehee, R.** *A computer assisted study of the transition from super- to subcritical Hopf bifurcation for parameterized families of maps of the plane* (Preliminary report), 354.

Arveson, William. *Topics in non self-adjoint operator algebras*, 89. *Quasitriangular operator algebras*, 287.

Ash, Avner. *Congruences between automorphic forms* (Preliminary report), 431.

Ash, J. Marshall. *Algebraic approximations to pi*, 25.

Ashby, Steven F. See **Mugler, Dale H.**

Askey, Richard. *Orthogonal polynomials as solutions to some specific three term recurrence relations* (Preliminary report), 459.

Asmuth, Charles A. *Characters of p-adic symplectic groups*, 51.

Assadi, Amir. H. and **Vogel, Pierre.** *Finite group actions on compact manifolds*, 542.

Assmus, E. F., Jr. and **Salwach, Chester J.** *A Kirkman-Sylvester problem for graphs*, 450.

Atkin, A. O. L. *Fourier coefficients of modular forms of halfintegral weight* (Preliminary report), 339.

Atkinson, Bruce W. and **Mitro, Joanna B.** *Applications of Revuz and Palm type measures for additive functionals in weak duality*, 107.

Attia, Farag A. *Optimal replacement when damage is either a Wiener process or the integral of a Markov chain*, 379.

Aull, C. E. *Some strong embeddings*, 370.

Auslander, Joseph and **Markley, Nelson G.** *Graphic minimal flows and topological minimal self joinings*, 590.

Avilas, Patricio U. and **Sandefur, James T.** *A unifying approach to nonlinear second order equations with applications to partial differential equations*, 65.

Avramov, Luchesar. *Homotopy Lie algebras for local rings and DG algebras* (Preliminary report), 456.

Axelsson, O. and **Layton, W.** *Defect correct methods for convection dominated, convection-diffusion problems*, 505.

Axler, Sheldon and **Shapiro, Joel H.** *VMO, Alexander's area estimate, and Putnam's theorem*, 470.

Ayoub, Raymond G. *Rademacher's contributions to additive and multiplicative number theory in algebraic number fields* (Preliminary report), 235.

Ayyaswamy, S. K. and **Ramakrishnan, P. V.** *Amenable semigroups and densities*, 205. *A remark on the equality of dimensions of left, right invariant means* (Preliminary report), 324.

Bachmuth, S. *Automorphisms of solvable groups*, 156.

Bachmuth, S., Mochizuki, H., Baumslag, G. and **Dyer, J.** *Automorphism groups of 2-generator metabelian groups* (Preliminary report), 240.

Baclawski, Kenneth. *Some combinatorial algorithms for group representations*, 409.

Bagley, Robert W., Wu, T. S. and **Yang, J. S.** *On a class of groups more general than* SIN, 247.

Baica, Malvina. *An algorithm in a complex field (and its application to the calculation of units)* (Preliminary report), 198. *n-dimensional Fibonacci numbers and their applications* (Preliminary report), 294. *Approximation of irrationals and Diophantine equations* (Preliminary report), 316.

Baird, Bridget B. *Maximal inverse subsemigroups of* $S(X)$ (Preliminary report), 161.

Baird, Paul. *Harmonic maps into spheres and certain Hamiltonian systems* (Preliminary report), 260.

Bajaj, Prem N. *An algorithm for partial fractions*, 123.

Bak, Anthony. *The* K_2*-analog of Hasse's norm theorem*, 520.

Balcázar, José L. *Simplicity for relativized complexity classes* (Preliminary report), 302.

Baldwin, Lawrence M. See **Gilbert, Gary G.**

Baldwin, Stewart. *The triangle ordering on normal ultrafilters*, 537.

Ball, R. D. $(n+1)$*-axial* $O(n)$, $U(n)$, *and* $\mathrm{Sp}(n)$ *actions on homotopy spheres*, 543.

Bambah, Ram P. *Non-homogeneous indefinite quadratic forms*, 29.

Banchoff, Thomas F. *Relative isoperimetric problems and the topology of linkage spaces*, 95.

Bange, David, Barkauskas, Anthony and **Slater, Peter.** *Similar lines and edge unique line graphs*, 18.

Bangert, Victor and **Klingenberg, Wilhelm.** *Homology generated by iterated closed geodesics*, 262.

Bank, Randolph E. *Multi-level iterative methods*, 442.

Bankston, Paul. *On partitions of plane sets into simple closed curves.* II, 326.

Bannai, Eiichi. *Orthogonal polynomials and algebraic combinatorics*, 451. *Spherical designs and group representations*, 516.

Bao, David. *The linearization stability of supergravity*, 441.

Bao, David. See **Yasskin, Philip B.**

Baouendi, M. S. *Microlocal hypo-analyticity and extension of CR functions*, 67.

Baras, Pierre and **Goldstein, Jerome A.** *The* L^2 *and* L^1 *theories of* $\partial u/\partial t = \Delta u + cu/\mid x \mid^2$, 460.

Barbut, Erol. See **Brandsl, Willy.**

Barkauskas, Anthony. See **Bange, David.**

Barker, G. P. *A geometric Gordon-Stiemke theorem* (Preliminary report), 147.

Barlow, M. T. *On dimensional stochastic differential equations with a singular increasing process*, 569.

Barlow, M. T., Jacka, S. and **Yor, M.** *Martingale-type inequalities for optional processes at general times*, 482.

Barlow, Martin and **Perkins, Edwin.** *On singularities of the sample paths of Itô integrals* (Preliminary report), 480.

Barnard, Roger W. *Criteria for local variations for slit mappings* (Preliminary report), 414.

Barnard, Roger W. and **Pearce, Kent.** *On rounding corners*, 347.

Barnard, Roger W. and **Schober, Glenn.** *Remarks on a problem of Clunie, Sheil-Small, and Hall*, 53. *Möbius transformations of convex mappings* II, 495.

Barnhill, R. E. *Survey of surface interpolation methods*, 285.

Barnhill, R. E. See **Arner, Paul R.**

Barnsley, M. F., Geronimo, J. S. and **Harrington, A. N.** *Geometry, electrostatic measure, and orthogonal polynomials on Julia sets for polynomials*, 56.

Barr, Michael. *Abstract Galois theory*, 43.

Bartossyński, Tomek and **Krawczyk, Adam.** *Measure and category*, 191.

Barucci, Valentina and **Dobbs, David E.** *On chain conditions in integral domains*, 491.

Basilicato, Isabelle Sesionale. *Structure of* $U(g)^k$ *for some classical groups*, 492.

Bastero, Jesus. l^p *block basis of each seuence with infinite dimensional span in stable Banach spaces*, 207.

Bates, P. W. and **Brown, K. J.** *Comparison results for a reaction-diffusion system*, 64.

Bates, Peter W. *Containment for weakly coupled parabolic systems*, 275.

Bator, Elisabeth. *Mappings from a separable Banach space to* $C(\Delta)$ (Preliminary report), 84.

Batterson, Steve. *Orientation preserving Morse-Smale diffeomorphisms on compact surfaces* (Preliminary report), 379.

Bauer, Douglas. *Extremal nonbipartite regular graphs of girth* 4, 405.

Baum, Paul and **Connes, Alain.** *Geometric K theory for Lie groups and foliations*, 375.

Bauman, Patricia. *Positive solutions of elliptic equations and their adjoints*, 460.

Baumslag, G. See **Bachmuth, S.**

Bauval, A. *Polynomial rings over fields* (Preliminary report), 188. *First order theory of polynomial rings over fields* (Preliminary report), 312.

Bayer, Margaret M. and **Billera, Louis J.** *Counting faces in labelled simplicial spheres and chains in Eulerian posets and polytopes*, 517.

Basley, Norman W. and **Weinacht, Richard J.** *Bifurcation of periodic solutions for wave equations with scalar nonlinearities*, 257.

Beachy, John A. *Stability over Noetherian rings* (Preliminary report), 273.

Beachy, John. See **Weakley, W. D.**

Beale, J. Thomas. *Analysis of vortex methods* (Preliminary report), 564.

Beals, Michael. *Propagation of smoothness for second order nonlinear hyperbolic equations* (Preliminary report), 462. *Self-spreading of singularities for nonlinear wave equations*, 561.

Bear, H. S. and **Hile, G. N.** *Phragmén-Lindelöf properties of heat functions*, 66.

Beard, J. T. B., Jr. *Bi-unitary perfect polynomials over* $GF(q)$ (Preliminary report), 32.

Beatrous, Frank and **Burbea, Jacob.** *Positive-definiteness and its application to interpolation problems for holomorphic functions*, 350.

Beaudoin, Robert E. *Aronszajn trees and Specker types on* $\aleph_2$ (Preliminary report), 11.

Bebernes, Jerrold W. *Invariance for functional parabolic systems*, 277.

Becker, Eberhard. *The real holomorphy ring of a field and its applications*, 551.

Becker, Howard. *Determinacy of Banach games*, 535.

Beckner, William. *Convexity and symmetry in Fourier analysis* (Preliminary report), 74. *Harmonic*

analysis, Sobolev inequalities and symmetrization (Preliminary report), 465.

Beder, Jay H. *Maximum likelihood estimates for binomial parameters when both are unknown, with application to birth and death processes* (Preliminary report), 480.

Beekman, John A. See **Park, Chull.**

Beekmann, Wolfgang and **Chang, Shao-chien.** *On summability invariants* (Preliminary report), 358. *Associativity and invariance properties in summability fields* (Preliminary report), 359.

Beem, John K. and **Parker, Phillip E.** *Whitney stability of solvability*, 96. *The classification and harmonic analysis of sectional curvatur* (Preliminary report), 96.

Beers, Donna, Hunter, Roger and **Walker, Elbert.** *A listing of finite simply presented valuated p-groups*, 243. *Applications of matrix representations to direct sum decompositions of finite valuated p-groups*, 246.

Beeson, Michael. *Some theories conservative over intuitionistic arithmetic*, 8.

Behrens, Ernst August. *A semigroup theoretical approach to the non-commutative arithmetic* (Preliminary report), 160.

Bell, Jonathan and **Cosner, Chris.** *Steady states and threshold behavior fo: some nonlinear differential/difference equations*, 276.

Bell, Murray G. *The space of complete subgraphs of a graph*, 213. *Supercompactness of compactifications and hyperspaces*, 326.

Bell, Murray and **Ginsberg, John.** *Compact spaces and spaces of maximal complete subgraphs* (Preliminary report), 134.

Bell, Steve. *Boundary behavior of holomorphic mappings and the $\overline{\partial}$-problem*, 54. *Proper holomorphic correspondences and the Bergman projection*, 350.

Bellenot, Steven F. *Somewhat quasireflexive Banach spaces*, 83. *Somewhat quasireflexive Banach spaces*, 173.

Bellow, Alexandra. *More on "bad universal" sequences in ergodic theory*, 347.

Benabdallah, Khalid. *Strong centers of isomorphism in primary abelian groups*, 245.

Benedetto, John J. *An inequality associated with the uncertainty principle*, 397.

Bengtson, Thomas E. *Beta functions for P_n*, 56. *An integral formula in P_n for Riemann's zeta function*, 353.

Bennett, H. R. and **Lutzer, D. J.** *Perfect GO-space* (Preliminary report), 99.

Benson, Max L. *Growth series of finite normal extensions of $\mathbf{Z}^n$ are rational*, 192.

Bercovici, H., Foiaş, C. and **Pearcy, C.** *(BCP)-operators, reflexivity, and the invariant subspace problem*, 86. *(BCP)-operators and dilation theory*, 88.

Bercovici, Hari. See **Apostol, Constantin**

Bercovici, Hari and **Foiaş, Ciprian.** *A real variable restatement of Riemann's hypothesis*, 471.

Berg, I. David and **Bishop, Richard L.** *Local uniqueness of geodesics* (Preliminary report), 501.

Berge, John. *Proper degree-one maps of 3-dimensional handlebodies*, 180.

Berger, Charles A. *Dilation and spectral theory for distributional functional calculi* (Preliminary report), 85.

Berger, Melvyn S. *A new variational principle for Einstein metrics on Kähler manifolds* (Preliminary report), 260. *The calculus of variations approach to Einstein metrics on compact Kähler manifolds*, 375. *The impact of gauge theory on infinite dimensional nonlinear analysis*, 375.

Berglund, John and **Hindman, Neil.** *Dissipative w.a.p. functions on* **N**, 75.

Berhanu, Shiferaw, Comfort, W. W. and **Reid, J. D.** *Counting subgroups and topological group topologies*, 200.

Berkson, E. R. and **Gillespie, T. A.** *Spectral decompositions and AC functions on the circle* (Preliminary report), 472.

Berman, Kenneth A. and **Hawrylycs, Michael.** *Telephone problems with failures*, 407.

Berman, Robert D. and **Piranian, George.** *Blaschke products and boundary trees* (Preliminary report), 412.

Berndt, Bruce C. and **Dieter, Ulrich.** *Sums involving the greatest integer function and Riemann-Stieltjes integration*, 227.

Berner, Andrew J. *Nowhere dense subsets of HFDs* (Preliminary report), 98.

Bernfeld, S. R. and **Lakshmikantham, V.** *Monotone methods for nonlinear boundary value problems in a Banach space* (Preliminary report), 58.

Bernhardt, Chris. *A partial ordering of permutations induced by continuous maps of the real line* (Preliminary report), 376.

Bers, L. *Holomorphic families of embeddings*, 573.

Betounes, David. *A distributional derivation of the macroscopic Maxwell equations*, 118.

Beyl, F. Rudolf. *The Schur multiplicator of $\mathrm{SL}(2, Z/mZ)$ and the congruence subgroup problem*, 45.

Bhatt, B. S. *Relative motion of liquid and porus spheres*, 403. *Slow rotation of a porous sphere*, 444. *The movement of single large liquid bubbles in vertical porous tubes*, 480.

Bhattacharya, Prabir and **Mukherjee, N. P.** *On the normalizer of a nilpotent subgroup of a finite group*, 317.

Bieri, Robert, Neumann, Walter D. and **Strebel, Ralph.** *A theorem on finitely presented groups* (Preliminary report), 410.

Billera, Louis J. See **Bayer, Margaret M.**

Binding, Paul and **Browne, Patrick J.** *A definiteness result for determinantal operators*, 92.

Birkenmeier, Gary F. *Right distributive semigroup* (Preliminary report), 47.

Birman, Joan S. and **Series, Caroline.** *An algorithm for simple curves on surfaces*, 263. *Simple curves and π_1-train tracks*, 576.
